

November 3, 2016
CC Docket No. 02-6; WC Docket 10-90; WC Docket No. 13-184

To whom it may concern:

These comments are in support of Boulder Valley School District's (BVSD) request to the FCC to waive a rule requiring BVSD to cost-allocate out of its E-Rate funding any off-campus use of a fiber ring to provide internet access to students in the district's low-income housing communities.

1. The school has not requested more services than are necessary for on-campus educational purposes;
2. No additional costs will be incurred by the Universal Service Fund; and
3. The majority of at-home use will be limited to hours in which classes are not in session.

The trend continues to grow demanding broadband services for increased digital curriculum and online collaboration, it would be a shame to not allow the increased utilization of existing infrastructure at no/minimal cost. Please help school districts reduce the impact of the 'digital divide' to students and their families.

Respectfully,

Dustin Reintsma
Executive Director of IT
Poudre School District
